
What's New In Manufacturing

In our continuing efforts to achieve our goals of DOT (Defect Free, On Time and at Targeted Cost), Rauland-Borg Manufacturing has just added three new machines to our arsenal. All three machines are state of the art and have been manufactured by the industry leaders in their fields. Improved quality while expanding our flexibility was of highest importance when selecting this equipment. With the addition of this new equipment we are sure to be in a good position to meet our customer's upcoming needs.

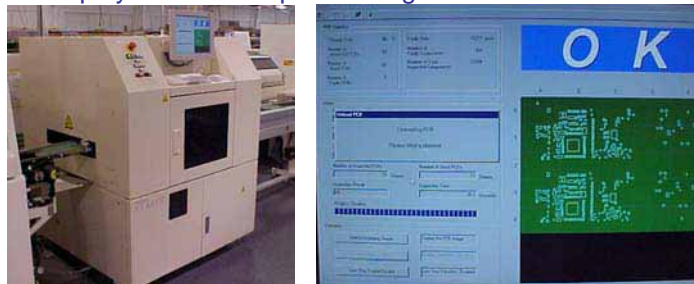

Technical Devices - wave solder machine.

Includes a newly developed spray fluxing process and fully computerize operations.

Omron - solder verification system.

Employs the latest optical recognition hardware and software.

Panasonic - high-speed surface mount placement machine.

Can place up to 38,000 parts per hour utilizing two heads with ten nozzles each. Every part is verified prior to placement by one of the 2D or 3D cameras located right on the machine.
